

Better Communications for a Better Guest Experience

We are excited to partner with Lost Dunes Golf Club and support their commitment to operational excellence. We appreciate their trust in our team to deliver reliable, future-ready communication solutions.

Situation

In a fast-paced environment like Lost Dunes Golf Club, clear and reliable communication is **essential**. The club had been relying on outdated radios with limited range, worn-out hardware, and too few channels to support the growing needs of staff across the property. Upgrading to a **modern communication system** became a necessity, for clearer communication across the organization.

Solution

To address the club’s communication challenges, Tele-Rad implemented a tailored solution using **Motorola SL300 and SL3500 digital radios**. They are compact, durable models ideal for both front-of-house and on-course use. Our technician ensured seamless installation at key locations, and provided clear guidance on radio operations. The result was an immediate **improvement in usability and clarity**, leaving staff confident to manage day-to-day operations.

Enhancing Security

In addition to improving communications, Tele-Rad is also implementing an Avigilon Alta cloud camera solution to enhance security and improve customer satisfaction at Lost Dunes.

A Word From Our Partners!

“Lost Dunes is very happy with the installations at the Front Desk and the Pro Shop downstairs. Tele-Rad's technician did a good job explaining how the radios operate and provided copies of the button and icon descriptions for the SL300 and SL3500 radios.”

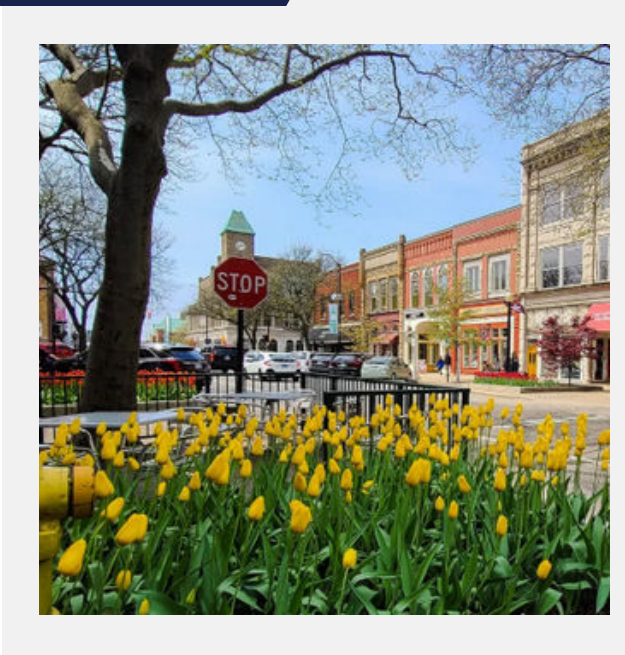

Michigan's Leader in Safety Technology

Serving as your trusted partner, since 1947.

Who We Are

At Tele-Rad, our mission is to serve as a trusted technology partner by empowering our customers to detect, analyze, communicate and respond faster and with better information by providing a unified ecosystem of hardware, software and services.

Located in Holland, we have been serving Michigan communities since 1947, applying our extensive local knowledge with a future-forward mindset

Why Choose Us

Deep Industry Experience

Tele-Rad has been recognized by our partners at Motorola Solutions as an Ecosystem Solutions Partner and Service Elite Specialist, distinguishing us as one of only a few Motorola Solutions partners across the country to sell, install, and service the full range of voice, video, physical security and data solutions.

Grant Assistance

Through our partnership with Motorola Solutions we can offer a variety of grant assistance opportunities, such as grant research, grant alert notices and grant application reviews from a team of grant experts. Locally, we can assist with proposing solutions and providing budgetary quotes for project planning purposes.

Relationships Matter

We approach business with a family mindset, treating each of our customers, employees and vendors like family
